

App. No. 09/649,215
Amendment C
Page 2

Amendments to the Specification

Please replace the paragraph starting at page 15, line 25 with the following amended paragraph:

In practice (when the DVD-ROM Engine 204 is implemented in an executable ~~for~~ form, as opposed to a dynamic link library (DLL)), the XML parser is activated using a command line; copies a new image of the DVD-ROM content from a golden image directory to a destination directory; extracts DVD-ROM Engine variables from the XML source file 202; and performs a search and replace of the instances of those variables in the JavaScript and HTML files in the destination directory.
